

Heuristic Search Testat

Implement the following algorithms and answer the same questions as you did for the systematic search algorithms.

- Greedy Search
- A* Algorithm
- IDA* Search

How do these informed search algorithms perform on our problem? Create the following overview table for the example problem.

[for each algorithm 7pt]

Algorithm	start	goal	cost	number of nodes visited	maximal stored nodes	complete	optimal
Greedy Search							
A*							
IDA*
